

CIPC 2018:

April 13-14, 2018

Canadian Interventional Pain Course

APR 13-14, 2018

FRI & SAT

Ben Sadowski Auditorium &
U of T Surgical Skills Centre
Mount Sinai Hospital
Toronto, ON

Who should attend:

- Family physicians
- Anesthesiologists
- Physical Medicine and Rehabilitation Physicians
- Psychiatrists
- Physiatrists
- Rheumatologists
- Sports Medicine Physicians
- Allied Health
- Health professionals with an interest in pain management

Join us for a comprehensive two-day review of the diagnostic and therapeutic approach to the patient suffering from common painful conditions.

Day One of this course will consist of didactic and interactive lectures, with a focus on the basic science of anatomy, pathophysiology, and epidemiology of common painful conditions. Day Two is an all-day skills lab, focusing on interventional spine and joint pain procedures on live and cadaveric models with ultrasound and fluoroscopy.
